Summary:

Software Engineer with experience developing and maintaining production-grade SaaS applications. Skilled in Java, Spring Boot, NestJS, REST APIs, SQL databases, and cloud-based deployments on AWS. Contributed to the development of eJTime, a workforce management platform supporting web, desktop, and mobile workflows. Strong foundation in backend development, authentication systems, database design, and scalable application architecture.

Skills:

- Languages: Java, JavaScript
- Backend: Spring Boot, NestJS, Hibernate, REST APIs, Microservices
- Frontend: React.js, Next.js, HTML5, CSS3
- Database: MySQL, PostgreSQL, Prisma ORM
- Cloud & Tools: AWS (EC2, S3, RDS), Agentic AI Gateways, Git, Maven, Jira
- Architecture Concepts: Multi-Tenant SaaS, Token Rotation Security (JWT), System Design, DSA, OOP, Agile Sprints

Professional Experience:

Software Engineer | eJAmerica | 09/2025 – 06/26 | Mysuru

- Developed and maintained eJTime, a multi-tenant SaaS workforce management platform supporting web, desktop, and mobile applications.
- Developed scalable frontend modules using React, Next.js, and TypeScript for dashboards, attendance tracking, reporting, and workforce management workflows.
- Designed and implemented RESTful APIs using NestJS, Prisma ORM, and MySQL for user management, project tracking, session management, and reporting services.
- Implemented secure authentication and authorization using OTP, JWT, refresh tokens, and role-based access control (RBAC).
- Collaborated with cross-functional teams in Agile development cycles to deliver product enhancements and bug fixes.

Java Full Stack Developer Intern | Radixile Technologies Solutions | 02/2025 – 08/2025 | Remote

- Developed RESTful APIs for visitor tracking and resident communication systems
- Built backend modules using Spring Boot and PostgreSQL for a society management platform
- Collaborated in Agile development cycles to deliver features with improved code quality

Projects:

LearnSphere: E-Learning Platform

- Developed a full-stack learning management platform for students and trainers.
- Designed REST APIs Using Spring Boot backend Services for course management, lesson delivery and JWT-based authentication and role-based authorization also Built responsive React interfaces

AquaTrack: Water Plant Management System

- Developed system for stock, export, and vending tracking, using Spring Boot and JPA as backend
- Deployed using AWS (EC2, RDS, S3)

Certification:

Java Full Stack Development

KodNest Technologies Pvt Ltd | Jun 2024 – Jan 2025

Education:

- **B.E in Computer Science and Engineering** 2020 – 2024
VTU Belagavi | Karwar, Karnataka | 7.09 CGPA
- **Spandana PU Science College** 2018 – 2020
Ilkal, KARNATAKA | Scored 73%

Achievements:

- Winner at **Hackzion v.1 Hackathon**, developed an innovative open-source project.
- Active member, **Rotary Club**, fostering teamwork and community service
